[3] Waste (WS)

[3.10] Total volume inorganic waste produced last year

Type of waste	amount (ton)					
	Produced		reduced	Treated		
	Last year	This Year		reused	down-cycled	up-cycled
inorganic non-toxic	80	63	17	63		
- paper	48	38	10	38		
- soft plastic	19	15	4	15		
- hard plastic	13	10	3	10		
- etc						

Description:

Inorganic non-toxic waste generated on campus this year mainly includes paper, cardboard, soft plastic, hard plastic, and other non-hazardous recyclable materials produced through educational, administrative, and everyday campus activities. Paper waste includes office paper, printed documents, study materials, and cardboard. Plastic waste includes bottles, packaging, containers, and other soft and hard plastic items. These waste streams are collected separately in order to improve waste segregation and support recycling practices. Recyclable paper, cardboard, and plastic waste collected on campus are transferred to the Andijan regional branch of UZVTORTSVETMET for further recycling. In addition, the use of water refill points and reusable cups and bottles helps reduce the amount of single-use plastic generated on campus.
