[3] Waste (WS)

[3.11] Total volume inorganic waste treated this year

Type of waste	amount (ton)					
	Produced		reduced	Treated		
	Last year	This Year		reused	down-cycled	up-cycled
inorganic non-toxic	80	63	17	63		
- paper	48	38	10	38		
- soft plastic	19	15	4	15		
- hard plastic	13	10	3	10		
- etc						

Description:

The inorganic non-toxic waste treated on campus this year mainly consisted of paper, cardboard, soft plastic, hard plastic, and other non-hazardous recyclable materials. A small portion of these materials was reused on campus, while the main share was down-cycled through conventional recycling channels. Recyclable paper, cardboard, and plastic waste collected on campus were transferred to the Andijan regional branch of UZVTORTSVETMET for further recycling. The institute also continued to promote waste reduction through separate collection practices, the use of reusable drinking containers, and water refill points, which contributed to lower single-use plastic consumption and improved treatment efficiency for inorganic waste.
