[3] Waste (WS)

[3.3] Total volume of paper and plastic produced last year

Type of waste	amount (ton)		
	Produced		reduced
	Last year	This Year	
Plastic	32	25	7
- A(soft plastic)	19	15	4
- B ((hard plastic)	13	10	3
Paper	48	38	10
- A(office paper)	24	19	5
- B(study materials	17	13	4
- etc(cardboard)	7	6	1

Description:

Last year, the total volume of paper and plastic waste produced on campus was 80 tons, consisting of 32 tons of plastic waste and 48 tons of paper waste. Plastic waste included 19 tons of soft plastic and 13 tons of hard plastic, while paper waste included 24 tons of office paper, 17 tons of study materials, and 7 tons of cardboard.

The relatively high volume of paper waste was mainly related to printed documents, teaching materials, administrative paperwork, and examination papers. Plastic waste was generated from packaging materials, disposable items, and daily campus activities. Recyclable paper, cardboard, and plastic waste were collected separately and transferred for further recycling and proper processing.

This activity supports SDG 12 – Responsible Consumption and Production by promoting waste separation, recycling, and responsible resource use. It also contributes to SDG 13 – Climate Action by reducing the environmental impact of waste and supports SDG 11 – Sustainable Cities and Communities by helping to maintain a cleaner and more sustainable campus environment.
