[5] Transportation (TR)

[5.13] Ratio of Parking Area to Total Campus Area (TR.5)

Parking for management: faculty deans, heads of departments and centers

**Description:**

Andijan State Institute of Foreign Languages maintains a well-regulated parking area as part of its commitment to sustainable campus land use management.

Campus and Parking Area Data:

- Total main campus area: 96,530.04 m²
- Total parking area: 2,420 m²
- Number of parking spaces: 6 spaces
- Ratio of parking area to total campus area: 0.0251 (2.51%)

Analysis: The minimal ratio of parking area to total campus area demonstrates the institute's deliberate policy to limit private vehicle access across its grounds. With only 6 designated parking spaces and a parking area covering just 2.51% of the total campus, the institute effectively discourages excessive private vehicle use among students and staff. This approach supports the broader institutional goal of promoting sustainable, non-motorized transportation alternatives such as cycling and carpooling, while ensuring that the vast majority of campus land remains dedicated to academic, recreational, and green spaces rather than vehicle infrastructure.

The evidence provided may also include maps showing the location, area size, or distribution of parking facilities across the campus.
